

Bionare

Foliar
Complex
Biostimulant

Liquid based on L-Amino acids, vitamins and microelements

guaranteed analysis

MAJOR ELEMENTS	% P / V
Total Nitrogen (N)	3.9
Phosphorous (P ₂ O ₅)	2.6
Potassium (K ₂ O)	2.6
SECONDARY ELEMENTS	% P / V
Calcium (Ca)	0.20
Magnesium (Mg)	0.26
AMINO ACIDS	% P / V
L - Amino acids	24.0
MICROELEMENTS	% P / V
Boron (B)	0.04
Cobalt (Co)	0.005
Copper (Cu)	1.30
Iron (Fe)	2.00
Manganese (Mn)	1.30
Molybdenum (Mo)	0.005
Zinc (Zn)	2.60
VITAMINS	% P / V
B1 Vitamins	0.15

Available in three presentations:
250 ml, 1 liter and 9.5 liters

general information

Bionare is a liquid foliar complex bioestimulant based on L-Amino acids, vitamin and chelated microelements. The components of its formulation interact over the metabolic processes of plants, stimulating their vegetative development

and favouring the earliest recovery of cultivation against possible growth retardation, caused by adverse conditions or stress, such as frost, radical choking, hailstorms, etc.

warning and cautions for use

Bionare is a slightly toxic product, however, it is convenient to follow all the basic cautions for the proper use of pesticides, such as: wearing protective clothing (overall), lenses or goggles, cap, mask, gloves and rubber boots.

Avoid eye or skin contact, as well as inhalation or product ingestion. Not smoking, eating or drinking during the use, handling or product application.

CULTIVATION	DOSES	SEASON AND NUMBER OF APPLICATIONS
Vegetables	250 - 500 ml / ha	1) After the transplant 2) Apply every 10 to 15 days in stress situations for plants
Chili and Tomato	350 - 500 ml / ha	1) After the transplant 2) Apply every 10 to 15 days in stress situations for plants
Cucurbitaceous	350 - 500 ml / hectare	1) Apply every 10 to 15 days in stress situations for plants
Potato	250 - 350 ml / ha	1) Apply every 10 to 15 days in stress situations for plants
Fruit trees in general	200 - 300 ml for each 100 lts of water	1) Every 10 to 15 days, during the vegetative development 2) Apply every 10 to 15 days in stress situations and/or retarded growth

instructions for use

Bionare is a liquid biostimulant of high concentration and solubility. It was specifically designed to provide its assimilable components through foliar way, if it's required it could be applied also on the root system through fertirrigation.

warranty advice

GERMINARE, S.A. DE C.V. ensures that the content of the bottle is found in conformity with the specifications of its label. Due to the fact that the use of the product is out of control from GERMINARE, there is no expressed or implicit guarantee over the inherent effects and/or results of its use, whether if it is or it is not used according to the instructions provided. The buyer accepts all risks for use and handling of the product.

calibration

ALWAYS CALIBRATE YOUR APPLICATION EQUIPMENT. Before use, SHAKE VIGOROUSLY THE PRODUCT INSIDE THE BOTTLE. Measure the quantity of **Bionare** to use, according to the use recommendations and do not exceed the recommended doses. To get the best results, follow the mixing instructions.

incompatibility

Bionare is compatible with most of the agrochemicals of common use, however, it is always advisable to do a small compatibility test, before mixing it with other products.
