Phosphorous (P ₂ O ₅)	0.5
AMINO ACIDS	% P / V
L-Amino acids	15.0

Available in two presentations:
5 liters, 9.5 liters and 20 liters

general information

Bionare Suelo is a liquid root complex bioestimulant based on L-Amino acids. The components of its formulation interact over the metabolic processes of plants, stimulating them in a natural way, increasing the vegetative development and the productivity of the cultivation.

It has an invigorating and antistress effect, favouring the early recovery against growth retardation caused by stress and adverse conditions, such as frost, radical choking and hailstorms.

warning and cautions for use

Bionare Suelo is a slightly toxic product, however, it is convenient to follow all the basic cautions for the proper use of pesticides, such as: wearing protective clothing (overall), lenses or goggles, cap, mask, gloves and rubber boots.

Avoid eye or skin contact, as well as inhalation or product ingestion. Not smoking, eating or drinking during the use, handling or product application.

CULTIVATION	DOSES	SEASON AND NUMBER OF APPLICATIONS
Chili and Tomato	3 - 4 lts / ha per application pressurized irrigation: break down in 2 or 3 irrigations	1) Immediately after the transplant 2) 15 days after 3) Apply every 10 to 15 days in stress situations for plants
Vegetables in general	2 to 3 liters / ha per application	1) Immediately after the transplant 2) Every 10 to 15 days in stress situations for plants
Cucurbitaceous	2 - 3 liters / ha per application pressurized irrigation: break down in 2 or 3 irrigations	1) Immediately after the transplant 2) 15 days after 3) Apply every 10 to 15 days in stress situations for plants
Potato	2 - 3 liters / ha per application	1) Apply 40 days after planting 2) 15 days after 3) Apply every 10 to 15 days in stress situations for plants
Fruit trees in general	2 - 3 liters / ha per application	1) At the beginning of the flowering 2) At the end of the flowering 3) 15 days after 4) Every 15-20 days, during the fruit growth, or in situations of stress and/or vegetative every 10 to 15 days, during the vegetative development

instructions for use

Bionare Suelo is a liquid biostimulant of high concentration and solubility. It was specifically designed to provide its assimilable components through root way, whether by pressurized irrigation or other systems.

warranty advice

GERMINARE, S.A. DE C.V. garantiza que el contenido del envase se encuentra conforme a las especificaciones de la etiqueta. Debido a que el uso del producto está fuera de su control, no se da garantía expresa ni implícita sobre los efectos y/o resultados inherentes a su uso, tanto si se emplea o no de acuerdo con las indicaciones. El comprador acepta todos los riesgos del uso y manejo del producto.

important

When pressurized irrigation is available it is recommended to break down the doses in 2 or 3 irrigations.

calibration

ALWAYS CALIBRATE YOUR APPLICATION EQUIPMENT. Before use, SHAKE VIGOROUSLY THE PRODUCT INSIDE THE BOTTLE. Measure the quantity of **Bionare suelo** to use, according to the use recommendations and do not exceed the recommended doses. **It should only be mixed with registered product in the authorized cultivations.**

incompatibility

Bionare Suelo is compatible with most of the agrochemicals of common use, however, it is recommended **NOT TO MIX** with oils, sulphur and copper. It is always advisable to do a small compatibility test, before mixing it with other products.
