

Germi-K

Foliar
Nutrient
Liquid

Rich in Potassium and L - Amino acids.

guaranteed analysis

MAJOR ELEMENTS	% P / V
Available Phosphorous (P ₂ O ₅)	30.0
Available Potassium (K ₂ O)	35.0
AMINO ACIDS	% P / V
L-Amino acids	4.5

Available in two presentations:
1 lt and 20 liters

general information

Germi - K is a liquid foliar nutrient with high concentration in potassium combined with L-amino acids and absorbable phosphorous. These components can intervene in the plant, triggering a better photosynthetic activity, protein synthesis, greater resistance to sickness, as well as the achievement

of a harvest with higher quality. The combination of potassium and L-amino acids allows a bigger and faster assimilation of this elemental nutrient. It is an effective complement in the soil fertilization.

warning and cautions for use

Germi - K is a slightly toxic product, however, it is convenient to follow all the basic cautions for the proper use and handling of pesticides, such as: wearing protective clothing (overall), lenses or goggles, cap, mask, gloves and rubber boots.

Avoid eye or skin contact, as well as inhalation or product ingestion. Not smoking, eating or drinking during the use, handling or product application.

CULTIVATION	DOSE	SEASON AND NUMBER OF APPLICATIONS
Celery, broccoli, cauliflower and lettuce	3- 4 lts.1000 lts of water	From 2 to 3 applications every 2 weeks, up to 10 days before the harvest
Potato	2 to 3 lts / ha	1) 4 - 5 weeks after the sowing 2) 1 to 2 applications more, every 21 days
Cucurbits (pumpkins, melon, cucumber and watermelon)	2 to 3 lts / ha	1) After the flowering 2) Formation of the first fruit 3) Repeat from 14 to 21 days after
Citrus fruits and fruit trees in general	2 a 4 lts - 1000 lts of water	1) At the beginning of the fruit development 2) From 1 to 3 applications more, every 7 to 10 days
Banana, pineapple, avocado, papaya, guava	3 a 4 lts -1000 lts of water.	1) After the flowering 2) From 1 to 2 applications more, every 21 days
Ornamental plants with flower	3 a 4 lts -1000 lts of water	Every 7 to 15 days. Since pre-flowering.
Cotton	2 to 3 lts / ha	1) 4 to 5 weeks after the sowing 2) 1 to 3 applications more, every 3 to 4 weeks
Bean and soy	2 to 3 lts / ha	1) 4 to 5 weeks after the sowing. 2) 1 to 3 applications more, from 3 to 4 weeks.

incompatibility

Germi - K is compatible with most of the agrochemicals of common use, however, it is always advisable to do a small compatibility test, before mixing it with other products, since it has alkaline pH.

warranty advice

GERMINARE, S.A. DE C.V. ensures that the content of the bottle is found in conformity with the specifications of its label. Due to the fact that the use of the product is out of control from GERMINARE, there is no expressed or implicit guarantee over the inherent effects and/or results of its use, whether if it is or it is not used according to the instructions provided. The buyer assumes all risks for use and handling of the product.

instructions for use

Germi - K Germi K is a liquid soil enhancer of high concentration and solubility. It has been specifically designed to provide potassium and phosphorous to be applied via the root system, through fertirrigation.

calibration

ALWAYS CALIBRATE YOUR APPLICATION EQUIPMENT. Before use, SHAKE VIGOROUSLY THE PRODUCT INSIDE THE BOTTLE. Measure the quantity of **Germi K** to use, according to the use recommendations and do not exceed the recommended dose. To get the best results, follow the mixing instructions.
